

## MOTIVE SX Series Loudspeakers

The **SX** generation of Motive loudspeakers maintains the essential appeal of the original versions whilst introducing significant improvements in all aspects of performance.

The **MOTIVE SX1** (right) takes up less space than that of a small standmount speaker on a stand. It can be positioned very close to room boundaries, making it highly adaptable and versatile in use.

music to the **n**<sup>TH</sup> degree

The award-winning Motive range has been in production since 2005, winning friends and critical acclaim all around the world. The original designs have been steadily modified during this period, subtly improving performance and consistency.

The first and most obvious change from the original to the **SX** series is to the tweeter. Neat have always believed that the tweeter is the most important ingredient in a multi-way loudspeaker, and the key to its overall integrity. A newly designed aluminium dome that is anodised with a black coating to improve stiffness has replaced the original titanium dome. The new **SXT** tweeter retains the fast, uncompressed quality of its predecessor, though now possessing a more natural and cleaner tonal balance.

The crossovers have also been revised for the new tweeter using superior components, more akin to those used in Neat's more upmarket models. Simple three-element crossovers are mainly employed, a principle strongly favoured by Neat's designers.

Internal bracing and damping of the cabinets have been upgraded and the LF tuning optimised for each model in order to achieve excellent bass extension and control from such modest enclosures.

There are three main models in the range, the floorstanding **SX1** and **SX2** models, and the **SX3** bookshelf/stand mount. A centre-channel speaker, the **SXC**, is available for multi-channel. Home cinema applications.

For over twenty years Neat loudspeakers have been hand crafted by a dedicated team based in Teesdale in the north of England. The designers of Neat loudspeakers are musicians with a vast range of experience of playing live and in the recording studio - and this translates into their designs.

An equally dedicated group of specialist dealers in the UK and around the world can also demonstrate why, if it's the ultimate musical experience you are after, Neat is the perfect choice.

**The Neat Motive SX series presents a series of attractive and room-friendly solutions, delivering musical performances of convincing authority and a compelling musical experience overall.**
